

Nicolas Michel

Principal Product Manager - Technical Leader

Technical Leader in the networking industry with 15 years of experience, I have a deep understanding in Data Center, Cloud and networking technologies. I have a proven track record of success in implementing and managing large-scale networking projects, and I have a reputation for building strong, collaborative teams. Expert in Software Defined Networking and virtualization, I have successfully led the development of several innovative networking solutions that have significantly improved the performance and efficiency of our clients' networks. My goal is to transform my customers business requirements into viable technological solutions.
